

Who Rescued Who Program

This program is best suited for adult/juvenile dogs with no previous training experience. It is “pawesome” for rescue dogs who need help building their confidence, have common behaviour problems, or who need help understanding basic canine manners. With persistence, consistency and repetition, your goals can be achieved.

The program is completely customized for each client based on what you want from your dog. It is known that one approach will not work with all dogs, so a unique program will be developed for your dog based on its temperament and what best motivates the dog. Lifestyle of the dog owner and home environment will also be taken into account.

There is no set number of sessions for this program, as no two dogs are the same. Some can grasp the canine life skills with ease, while others need just a little more time. We will work at a productive pace that is in the best interest of the dog.

Along the way, we will work on leash training, sit where I put you, stay close, stay at a distance, come when called.

As a dog owner you will learn to become an effective leader by rewarding good behaviour, and establishing a positive relationship with your dog.

An in person consultation and evaluation must be first be completed in order to accurately assess the dog in its environment. During this time the history, temperament and personality of the dog will be acknowledged and evaluated. Any concerns and or questions the owner has can be discussed at this time. This will help in deciding which direction will be taken.
